Achieving sustainable cultivation of grain legumes - Vol.1
Advances in breeding and cultivation techniques
Edited by: Dr Shoba Sivasankar, Dr David Bergvinson, Dr Pooran Gaur, Dr Shiv Kumar Agrawal, Dr Steve Beebe and Dr Manuele Tamò

KEY FEATURES

• Reviews key developments in understanding crop physiology and genetic diversity and how they have informed advances in breeding new varieties
• Coverage of advances across the value chain for grain legume cultivation, from variety selection to post-harvest storage
• Discusses the latest trends in disease, insect pest and weed management

CONTENTS

Part 1 Plant physiology and breeding
1. Advances in understanding grain legume physiology: stomatal behavior and response to abiotic stress: E. Troyo-Díazquez and A. Nieto-Ganibay, Centro de Investigaciones Biológicas del Noroeste, Mexico; J.L. García-Hernández, Universidad Juárez del Estado de Durango, Mexico; P. Preciado-Rangel, Instituto Tecnológico de Torreón, Mexico; F. A. Beltrán-Morales and F. H. Rúa-Espinosa, Universidad Autónoma de Baja California, Mexico; and B. Munillo-Amador, Centro de Investigaciones Biológicas del Noroeste, Mexico
2. Advances in understanding grain legume physiology: understanding root architecture, nutrient uptake and response to abiotic stress: Yinglong Chen, The University of Western Australia, Australia and Northwest A&F University, China; Ivica Džajovic, Institute of Field and Vegetable Crops, Serbia; and Kadambot Siddique, The University of Western Australia, Australia
3. Conserving and characterization of the genetic diversity of grain legumes: P. J. Branel and H. D. Upadhyaya, Global Crop Diversity, Germany and International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), India
4. Advanced breeding techniques for grain legumes in the genomics era: Juan M. Osorno and Phillip E. McClean, North Dakota State University, USA, and Timothy Close, University of California, USA
5. Genetic modification of grain legumes: Pooja Bhatnagar-Mathur and Kriyan Kumar Sharma, International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), India
6. Developing drought- and heat-tolerant varieties of grain legumes: Shoba Sivasankar, Former Director, CGIAR Research Program on Grain Legumes, India
7. Developing pest- and disease-resistant cultivars of grain legumes: Diego Rubiales, Institute for Sustainable Agriculture, Spain
8. Biofortification of grain legumes: Bodo Raatz, International Center for Tropical Agriculture (CIAT), Colombia

Part 2 Cultivation
9. Variety selection and seed quality management in grain legume cultivation: Jean Claude Rubengayo, Pan-Africa Bean Research Alliance (PABA) and International Center for Tropical Agriculture (CIAT), Tanzania; and Wilfred Odhiambo, Seed Systems Consultant, Kenya
10. Grain legumes in integrated crop management systems: Chris Johansen and Kadambot H.M. Siddique, The University of Western Australia, Australia
11. Grain legume-cereal intercropping systems: L. Bedoussac, ENSSEA, INRA AGIR, France; E-P. Journet, CNRS UPM, INRA AGIR, France; H. Hauggaard-Nielsen, Roskilde University, Denmark; C. Naudin and G. Corre Hellou, Ecole Supérieure d’Agricultures, France; E. S. Jensen, Swedish University of Agricultural Sciences, Sweden; and E. Justes, INRA AGIR, France
13. Diseases affecting grain legumes and their management: Keith Thomas, University of Sunderland, UK
14. Insect pests and integrated pest management techniques in grain legume cultivation: Tolulape A. Agunbiade, Yale University, USA; Weilin Sun, Michigan State University, USA; Brad S. Coates, USDA-ARS, USA; Foussé et ni Traore, Institut de l’Environnement et de Recherches Agricoles, Burkina Faso; James A. Ojo, Kwara State University, Nigeria; Anne N. Lutome, University of Illinois at Urbana-Champaign, USA; Julia Bello-Bravo, Michigan State University, USA; Saber Miresmailli, Ecoation Innovative Solutions Inc., Canada; Joseph E. Huesing, USAID, USA; Michael Aygukum, Department of Agricultural, Food and Resource Economics, Michigan State University, USA; Manuele Tamò, International Institute of Tropical Agriculture, Benin; and Barry R. Pittendrigh, Michigan State University, USA
15. Weed management in grain legume cultivation: Don W. Manishita, University of Idaho, USA
16. Grain legume storage in developing nations: L. L. Murdock and D. Baributsa, Purdue University, USA
17. Drying, handling, storing and quality monitoring of pulses: C.B. Singh, University of South Australia, Australia; and D.S. Jayas, University of Manitoba, Canada
18. Dietary health benefits, phytochemicals and anti-nutritional factors in grain legumes: Elizabeth Ryan, Colorado State University, USA; Indi Trehan, Kristie Smith and Mark Manary, Washington University, USA
19. The nutritional potential of grain legumes: an economic perspective: Alan de Brauw, International Food Policy Research Institute, USA

“This reference will greatly improve the visibility of, and access to knowledge about crops that play such a critical role in sustainable cropping systems, nutrition and income, yet which often remain under the radar of governments and policy makers and which do not always receive the investment they deserve.” Jeff Ethers, Program Officer in Agricultural Development, Bill & Melinda Gates Foundation
Achieving sustainable cultivation of grain legumes - Vol.2

Improving cultivation of particular grain legumes

Edited by: Dr Shoba Sivasankar, Dr David Bergvinson, Dr Pooran Gaur, Dr Shiv Kumar Agrawal, Dr Steve Beebe and Dr Manuele Tamò

KEY FEATURES

- Detailed coverage of particular grain legumes
- Chapters on each key aspect of grain legume cultivation: improved varieties and advances in cultivation techniques
- International range of authors with specific expertise in each grain legume

CONTENTS

Part 1 Cultivation of common beans, lentils, soybeans and groundnuts

1. Developing improved varieties of common bean: James D. Kelly, Michigan State University, USA
2. Improving cultivation practices for common beans: Jovin Q. Qijem, Kenya Agricultural and Livestock Research Organization, Kenya
3. Developing improved varieties of lentil: William Erskine, University of Western Australia, Australia; Ashutosh Sarker, International Center for Agricultural Research in the Dry Areas (ICARDA), India; and Shiv Kumar, International Center for Agricultural Research in the Dry Areas (ICARDA), Morocco
4. Improving cultivation of lentil: Fred J. Muehlbauer, Washington State University, USA; and Ashutosh Sarker, International Center for Agricultural Research in the Dry Areas (ICARDA), India
5. The use of marker-assisted selection in developing improved varieties of soybean: Y-C. Lee, R. Lemes Hamawaki, V. Colantonio, M. J. Iqbal and D. A. Lightfoot, Southern Illinois University, USA
6. Improving cultivation practices for soybeans in sub-Saharan Africa: Frederic P. Bajuyika and Harun M. Munthi, International Institute of Tropical Agriculture (ITTA), Tanzania; and Fred Kanampu, International Institute of Tropical Agriculture (ITTA), Kenya
7. Improving cultivation practices for soybeans: C. Michael Deom, University of Georgia, USA; David Kalie Okello, National Semi-Arid Resources Research Institute, Uganda
8. Improving cultivation of groundnut: S. N. Nigam, International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), India; D. L. Jordan, North Carolina State University, USA; and P. Jania, International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), India
9. Preventing mycotoxin contamination in groundnut cultivation: David Jordan, Rick Brandenburg and Gary Payne, North Carolina State University, USA; David Hossington, Nick Magnan and James Rhoads, The University of Georgia, USA; Mumuni Abdululu, Savanna Agricultural Research Institute, Ghana; Koushih Ashkani and Jinu Chen, The University of Georgia, USA; Richard Akromah, William Appaw and William Ellis, Kwame Nkrumah University of Science and Technology, Ghana; Maria Balota and Kumar Mallarjunan, Virginia Polytechnic Institute and State University, USA; Kenneth Boote and Greg MacDonald, University of Florida, USA; Kira Bowen, Auburn University, USA; Boris Bravo-Ureta and Jeremy Jeffiffe, University of Connecticut, USA; Agnes Budu, University of Ghana, Ghana; Hendrix Chalwe, Alice Mweetwa and Munsanda Ngulube, University of Zambia, Zambia; Aweere Dankyi and Brandford Mochia, Crops Research Institute, Ghana; Vivian Hoffmann, International Food Policy Research Institute, USA; Amade Muita, Mozambique Institute of Agricultural Research, Mozambique; Agnes Mvanglela, Lilongwe University of Agriculture and Natural Resources, Malawi; Sam Njongo, International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), Malawi; David Okello, National Semi-Arid Resources Research Institute (NaSARRI), Uganda; and Nelson Opoku, University for Development Studies, Ghana

Part 2 Cultivation of cowpea, faba beans and pigeonpea

10. Breeding improved varieties of cowpea: B. B. Singh, G.B. Pant University of Agriculture and Technology, India
11. Improving the cultivation of cowpeas in West Africa: Alpha Y. Kamara, Lucky O. Omogui and Nikhi Kamari, International Institute of Tropical Agriculture (ITTA), Nigeria; Sylvester U. Ewanshi, University of Benin, Nigeria; and Haleem A. Ajeigbe, International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), Nigeria
12. Developing improved varieties of faba bean: Fouad Maalouf, International Center for Agricultural Research in the Dry Areas (ICARDA), Lebanon; and Seid Ahmed and Somanjagoda Peihi, International Center for Agricultural Research in the Dry Areas (ICARDA), Morocco
13. Efficient and sustainable production of faba bean: R. Redden, IJR Agricultural Consultants, Australia; X. Zong, Chinese Academy of Agricultural Sciences (CAAS), China; R. M. Norton, International Plant Nutrition Institute and University of Melbourne, Australia; F. L. Stoddard, University of Helsinki, Finland; F. Maalouf, International Center for Agricultural Research in Dry Areas (ICARDA), Lebanon; K. Seid and M. El Bouhsseni, International Centre for Agricultural Research in Dry Areas (ICARDA), Morocco; Y. Tao and L. Rong, Chinese Academy of Agricultural Sciences (CAAS), China; and Li Ling, Laoning Academy of Agricultural Science, China
14. Developing improved varieties of pigeonpea: K. R. Saxena, United Arab Emirates; Y. S. Chauhan, Department of Agriculture and Fisheries, Australia; C. V. S. Kumar, A. J. Hingane, R. V. Kumar, K. R. Saxena and G. V. R. Rao, International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), India
15. Improving the cultivation of pigeonpea: K. R. Latha and L. Vimalendran, Tamil Nadu Agricultural University, India
