## AVAILABLE NOW!

### About the book

This book provides a comprehensive review of the major pests and diseases affecting global banana production including Tropical Race 4, black Sigatoka and banana streak virus. It also explores existing methods for pest/disease diagnosis and identification, as well as current management strategies used to control and/or prevent outbreaks.

### About the editors

**Dr André Drenth** is Professor in Tropical Plant Pathology and Program Leader for crop protection in the Centre for Horticultural Science at the Queensland Alliance for Agriculture and Food Innovation (QAAFI), at the University of Queensland, Australia.

**Dr Gert H. J. Kema** is Professor of Phytopathology and chair at the Laboratory for Phytopathology of Wageningen University, The Netherlands. He initiated and coordinated several international banana research programs focusing on Fusarium wilt of banana and black Sigatoka.

### Achieving sustainable cultivation of bananas – Volume 3: Diseases and pests

Available in print and digital formats:

ISBN - print	978-1-78676-981-7
Pages	684
Pub. Date	March 2024
Price	£170/\$220/€205/C\$290
Series No	AS123

## Achieving sustainable cultivation of bananas – Volume 3: Diseases and pests

Edited by: Professor André Drenth, The University of Queensland, Australia and Professor Gert H. J. Kema, Wageningen University, The Netherlands

### Part 1 Fungal diseases

1. The Sigatoka leaf disease complex in banana: Jean Carlier, Luc De Lapeyre De Bellaire, Catherine Abadie, Marc Chillet and Dominique Carval, CIRAD, France; Robert Neil Gerard Miller, Universidade de Brasília, Brazil; Thangavelu R., National Centre for Banana Research – ICAR, India; and Josué Essoh Ngando, CARBAP, Cameroon
2. Controlling black leaf streak disease (BLSD) in banana: the case of Costa Rica: Pablo Chong, ESPOLE Polytechnic University, Ecuador; Claudiana Carr and Gilberth Murillo, National Banana Corporation (CORBANA) and Cropland Biosciences, Costa Rica; Mauricio Guzmán, Cropland Biosciences, Costa Rica; Randy Villalobos and Jorge Sandoval, National Banana Corporation (CORBANA) and Cropland Biosciences, Costa Rica; and Gert H. J. Kema, Wageningen University, The Netherlands
3. Freckle disease of banana: André Drenth, The University of Queensland, Australia; and Mee Hua Wong, Agriculture Research Centre Semongok, Malaysia
4. Fusarium wilt of banana: impact, epidemiology and management of Fusarium wilt Race 1 and 2: Einar Martínez de la Parte, Wageningen University and Research, The Netherlands and Instituto de Investigaciones de Sanidad Vegetal (INISAV), Cuba; and Luis Pérez-Vicente, Instituto de Investigaciones de Sanidad Vegetal (INISAV), Cuba
5. The past, present and future of Fusarium wilt of banana caused by Tropical Race 4: Fernando García-Bastidas, KeyGene B.V., The Netherlands; André Drenth, The University of Queensland, Australia; and Gert H. J. Kema, Wageningen University, The Netherlands
6. Towards sustainable management of Fusarium wilt of banana: André Drenth, The University of Queensland, Australia; and Gert H. J. Kema, Wageningen University, The Netherlands
7. Minor fungal diseases of banana: Luis Ernesto Pocasangre, Director of Research – EARTH University, Costa Rica; and Alfonso Martinuz, Especialista en Agricultura de la FAO para Nicaragua, Nicaragua

### Part 2 Bacterial and phytoplasma diseases

8. Moko bacterial wilt of banana: Mauricio Guzmán, Cropland Biosciences, Costa Rica; Marylin Sánchez, Mycelium Crop Science, Costa Rica; Ricardo Villalta, Independent Consultant, Costa Rica; Leonardo Pérez, Independent Consultant, Costa Rica; and Claudiana Carr, National Banana Corporation (CORBANA) and Cropland Biosciences, Costa Rica
9. Banana Blood disease: Jane Ray, Northern Territory Government, Australia; Siti Subandiyah, Universitas Gadjah Mada, Indonesia; and André Drenth, The University of Queensland, Australia
10. Xanthomonas wilt of banana: Guy Blomme, The Alliance of Bioversity International and The International Center for Tropical Agriculture (CIAT), Ethiopia; Elizabeth Kearsley, BlueGreen Labs, Belgium; and Walter Ocimati, The Alliance of Bioversity International and The International Center for Tropical Agriculture (CIAT) Uganda

11. Bacterial soft rot of banana: Luis Pérez-Vicente, Institute of Plant Health Research (INISAV), Cuba; and Armando García-Suárez, Central Plant Quarantine Laboratory (LCCV) of Central Unit of Laboratories (ULCSA), Cuba
12. Phytoplasma diseases of banana plants: Lilia C. Carvalhais, The University of Queensland, Australia; and Richard Davis, Australian Department of Agriculture, Fisheries and Forestry, Australia

### Part 3 Viral diseases

13. Banana bunchy top virus: John E. Thomas, The University of Queensland, Australia
14. Banana streak disease: Andrew D. W. Geering, Queensland Alliance for Agriculture and Food Innovation, The University of Queensland, Australia
15. Other viral pathogens of banana: Andrew D. W. Geering, Queensland Alliance for Agriculture and Food Innovation, The University of Queensland, Australia

### Part 4 Nematode pests

16. Nematodes in banana: Mieke Daneel, Agricultural Research Council – Tropical and Subtropical Crops/North-West University, South Africa; and Akhona Mbatyoti, Agricultural Research Council – Tropical and Subtropical Crops, South Africa
17. Towards sustainable management of nematodes in banana: Anthony B. Pattison and Jennifer A. Cobon, Department of Agriculture and Fisheries, Australia; Mario Araya-Vargas, AMVAC Chemical Corporation, Costa Rica; and Christian Chabrier, CIRAD, France

### Part 5 Insect pests

18. The banana weevil borer: César Guillén Sanchez, University of Costa Rica, Costa Rica
19. Banana Red Rust thrips: Frans Wielemaker Sanderse, Consultant (formerly Director of Research at Dole Fresh Fruit International), Costa Rica
20. Managing banana bunch pests: towards more ecological approaches: Charles Staver, Agricultural Scientist, USA; Luud Clercx, AgroFair, The Netherlands; Myriam Arias, INIAP, Ecuador; César Guillén Sanchez, University of Costa Rica, Costa Rica; Lieselot van der Veken, Pro Terra Agro, Belgium; and Marco Antonio Oviedo Cajas, Banana Specialist, Ecuador

### Part 6 Fruit diseases

21. Management of diseases on banana fruit in the field: Marc Jackson, Global Fruit Protection, Australia
22. Postharvest diseases of bananas and their sustainable management: M. Gloria Lobo and Goretta Díaz-Delgado, Instituto Canario de Investigaciones Agrarias (ICIA), Spain; and Francisco Javier Fernández-Rojas, Cooperativa Platanera de Canarias (COPLACA), Spain
