About the book

The coffee sector needs more sustainable methods of cultivation. This volume reviews the range of recent research addressing these challenges, from social and environmental sustainability to integrated management of pests and diseases based on agroecological principles.

About the editor

Professor Reinhold Muschler is the Latin American Chair in Agroecology and Agrobiodiversity at CATIE (the Center for Agricultural Research and Higher Education), Costa Rica. Professor Muschler has worked with leading international organizations such as the FAO, World Bank and IFAD, and is internationally recognised for his research on improving tropical smallholder agroecosystems for crops such as coffee.

Climate-smart production of coffee: Improving social and environmental sustainability

Available in print and digital formats:

ISBN - print 978-1-78676-483-6

Pages 480

Pub. Date October 2022

Price £150/\$195/€180/C\$255

Series No AS111

Climate-smart production of coffee: Improving social and environmental sustainability

Edited by: Professor Reinhold Muschler, CATIE, Costa Rica

Part 1 Improving social and environmental sustainability

1. Global coffee production and sustainability: *Carlos H. J. Brando, P&A Marketing, Brazil*
2. The coffee sector and smallholder farmers: *Gabriele Regio, Oxfam, Italy*
3. Assessing and managing the environmental and social impact of coffee production: *H. A. Jürgen Pohlen and Marc J. J. Janssens, University of Bonn, Germany; and Dennis José Salazar Centeno, Universidad Nacional Agraria Managua, Nicaragua*
4. Specialty coffees as drivers of change: *H. A. Jürgen Pohlen, University of Bonn, Germany; Dennis José Salazar Centeno, UNA Managua, Nicaragua; Juan Carlos Torrico-Albino, UMSA La Paz, Bolivia; and Marc J. J. Janssens, University of Bonn, Germany*
5. Fair-trade coffee: how fair is fair?: *Ruud Bronkhorst, InfoBridge Foundation, The Netherlands*
6. Advances in Arabica coffee breeding: developing and selecting the right varieties: *Álvaro Gaitán-Bustamante, Juan Carlos Arias-Suarez and Claudia Patricia Flórez-Ramos, Colombian National Coffee Research Center (CENICAFE), Colombia*
7. Optimizing post-harvest practices in coffee cultivation: *Carlos H. J. Brando and João Alberto P. Brando, P&A Marketing, Brazil*

Part 2 Sustainable pest and disease management

8. Insect pests affecting coffee: understanding agroecosystems and alternative methods of control: *Luis Fernando Aristizábal-Aristizábal, Independent Consultant, USA*
9. Diseases affecting coffee: an overview: *S. Daivasikamani and A. P. Ranjini, Central Coffee Research Institute, India*
10. Ecological perspectives on the coffee leaf rust: *Zachary Hajian-Forooshani and John Vandermeer, University of Michigan, USA*
11. Coffee wilt disease: *Julie Flood, CABI, UK*
12. Integrated management of nematodes of coffee: *Regina M. D. G. Carneiro and Marcilene F. A. dos Santos, Embrapa Recursos Genética e Biotecnologia, Brazil*
13. Integrated management of soil-borne insect and fungal pests of coffee: *Cesar J. Fanton and Renan B. Queiroz, Instituto Capixaba de Pesquisa, Assistência Técnica e Extensão Rural (INCAPER), Brazil; and Laércio Zambolim, Universidade Federal de Viçosa, Brazil*
14. Integrated weed management in coffee production: *Cláudio Pagotto Ronchi, Federal University of Viçosa, Brazil*
