

# BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

## Energy-smart farming

Efficiency, renewable energy and sustainability

Edited by Emeritus Professor Ralph E. H. Sims, Massey University, New Zealand

**bd** burleigh dodds  
SCIENCE PUBLISHING

## AVAILABLE NOW

### About the book

This collection reviews recent research undertaken on the ways of reducing the costs and environmental impact of on-farm energy use. It explores advances in improving energy efficiency on farms, renewable energy technologies, as well as how more sustainable energy use can be delivered in practice in livestock production systems.

### About the editor

**Ralph E. H. Sims** is Emeritus Professor of Sustainable Energy and Climate Mitigation at Massey University, New Zealand. In a distinguished career spanning 50 years, Professor Sims has also worked for the International Energy Agency and produced major reports on rural energy for the OECD, UNFCCC and UN FAO.

### Energy-smart farming: Efficiency, renewable energy and sustainability

Available in print and digital formats:

ISBN - print 978-1-78676-835-3

Pages 370

Pub. Date May 2022

Price £150/\$195/€180/C\$255

Series No AS115

# Energy-smart farming: Efficiency, renewable energy and sustainability

Edited by: Emeritus Professor Ralph E. H. Sims, Massey University, New Zealand

## Part 1 Efficient use of electricity, heat and fuel

1. Measuring and auditing on-farm energy use: *Majeed Safa, Lincoln University, New Zealand*
2. Advances in energy-efficient lighting and ventilation for food production systems: *Tom Tabler, Mississippi State University, USA*
3. Improving farm machinery operation and maintenance to optimise fuel use efficiency: *T. A. Jensen and J. N. Tullberg, University of Southern Queensland, Australia; and D. L. Antille, University of Southern Queensland and CSIRO Agriculture and Food, Australia*
4. Efficient water management and irrigation on farms: *K. Reardon-Smith and S. Mushtaq, Centre for Applied Climate Sciences, University of Southern Queensland, Australia; M. Scobie and J. Eberhard, Centre for Agricultural Engineering, University of Southern Queensland, Australia; and T. N. Maraseni, Centre for Sustainable Agricultural Systems, University of Southern Queensland, Australia*

## Part 2 On-farm renewable energy heat and power generation

5. Assessing and modelling the costs of on-farm distributed renewable energy systems: *Julio Pombo-Romero, University of Vigo, Spain*

6. Energy-smart innovation and renewable energy systems on farms: an overview: *Ralph E. H. Sims, Massey University, New Zealand*
7. On-farm biomass technologies for heat and power: *Ralph E. H. Sims, Massey University, New Zealand*
8. Developments in agrivoltaics: achieving synergies by combining plants with solar photovoltaic power systems: *Stefano Amaducci, Eleonora Potenza and Michele Colauzzi, Università Cattolica del Sacro Cuore, Italy*

## Part 3 Energy-smart farming: case studies

9. Tools and technologies to reduce fossil energy use on dairy farms: *Philip Shine and Michael D. Murphy, Munster Technological University, Ireland; and John Upton, Teagasc Moorepark, Ireland*
10. Energy-smart pig farming: *Lee J. Johnston and Kelsey L. Hammers, West Central Research and Outreach Center, University of Minnesota, USA*
11. Energy-smart poultry farming: *Yi Liang, University of Arkansas, USA*
