With increasing regulation and costs limiting the development of new fungicides, farmers remain reliant on a relatively small group of working fungicides, many of which are decreasingly effective as major crop pathogens develop resistance to them.

The book provides an authoritative review of the wealth of research on understanding the development of fungicide resistance in agricultural crops and the establishment of preventative measures which can be implemented to limit its spread and the consequent impact of disease on yields.

**About the editor**

**Dr Francesco J. Lopez-Ruiz** leads the Fungicide Resistance Group at the Centre for Crop and Disease Management which is based at Curtin University, Australia. He has published widely on the molecular mechanisms of fungicide resistance and its detection.

Understanding and minimising fungicide resistance

Edited by: Dr Francisco J. Lopez-Ruiz, Curtin University, Australia

Part 1 Understanding and managing resistance

1. How pathogens develop resistance to fungicides: an overview: Richard Oliver, University of Nottingham, UK
2. Molecular evolution and mechanisms of fungicide resistance in plant pathogenic fungi: Laetitia Chartrain and James K. M. Brown, John Innes Centre, UK
3. Tracking the development of fungicide resistance: Francisco J. Lopez-Ruiz, Curtin University, Australia
4. Crop disease control efficacy and selection for resistance: two sides of the same coin?: Frank van den Bosch, ADAS High Mowthorpe, UK; Stephen Parnell, The University of Warwick Wellesbourne, UK; and Neil Paveley, ADAS High Mowthorpe, UK
5. Fungicide resistance risk assessment: Mike Grimmer, ADAS Boxworth, UK
6. Good practice in minimising the development of fungicide resistance in crop pathogens: Neil Paveley, and Frank van den Bosch, ADAS High Mowthorpe, UK
7. Fungicide resistance: Evolutionary questions and practical implications: Nichola Hawkins, NIAB, UK
8. The role of Extension in fungicide resistance management: Guido Schnabel, Clemson University, USA; and Phillip M. Brannen, University of Georgia, USA
9. Key challenges in developing new fungicides: Gregory M. Kemmitt, Corteva Agriscience™, UK

Part 2 Case studies: resistance in key groups of fungicides

10. Understanding resistance to sterol biosynthesis inhibitor fungicides: Andreas Mehl, Bayer AG, Crop Science Division, Germany
11. Quinone outside inhibitor fungicide resistance: selection patterns and the current situation: Stefano F. F. Torriani and Helge Sierotzki, Syngenta Crop Protection AG, Switzerland
12. Understanding resistance to succinate dehydrogenase inhibitor fungicides: Wesley Mair, Centre for Crop and Disease Management, Curtin University, Australia
13. Understanding resistance to Anilinopyrimidine fungicides: Seiya Saito and Chang-Lin Xiao, USDA-Agricultural Research Service, San Joaquin Valley Agricultural Sciences Center, USA
14. Understanding resistance to oxysterol binding protein inhibitor fungicides: Jean-Luc Genet, Corteva Agriscience, France
