AVAILABLE NOW

About the book

This collection summarises current research on the effects of different management strategies on the physical, chemical and biological properties of soils. It assesses the viability of these management strategies, including zero tillage, as a means for improving crop yield, ecosystem productivity and soil health.

About the editor

Dr William R. Horwath is a Distinguished Professor of Soil Biogeochemistry and J. G. Boswell Endowed Chair in Soil Science at the University of California-Davis, USA. Professor Horwath is Editor of the Soil Science Society of America (SSSA) Journal and is a Fellow of the SSSA. He has published widely on measuring and improving soil health and climate impacts on ecosystems.

Improving soil health

Available in print and digital formats:

ISBN - print 978-1-78676-670-0

Pages 470

Pub. Date October 2022

Price £150/\$195/€180/C\$255

Series No AS109

Improving soil health

Edited by: Professor William R. Horwath, University of California-Davis, USA

1. Soil health: towards a sustainable world: *William R. Horwath, University of California-Davis, USA*

Part 1 Dimensions of soil health

2. Soil health: definitions, history, key concepts and hurdles: *Michelle M. Wander, University of Illinois at Urbana-Champaign, USA*
3. Understanding biological processes in soil: *Regina O'Kelley and David D. Myrold, Oregon State University, USA*
4. Mycorrhizae and soil health: *Muhammad Adnan and Fazli Wahid, The University of Swabi, Pakistan; Shah Fahad, The University of Haripur, Pakistan; Muhammad Arif, The University of Agriculture Peshawar, Pakistan; Songmei Shi, Yunnan Agricultural University, China; and Xinhua He, Southwest University, China, University of California-Davis, USA and University of Western Australia, Australia*

Part 2 Cultivation practices and soil health

5. Agricultural traffic management systems and soil health: *Paula A. Misiewicz, Magdalena Kaczorowska-Dolowy, David R. White, Edward Dickin and Richard J. Godwin, Harper Adams University, UK*
6. Assessing the effects of no-till cultivation practices on soil health: *Alison Hamm and Daniel K. Manter, USDA-ARS, USA*
7. Cover crops for soil health: *Sieglinde S. Snapp, Michigan State University, USA; Carmen M. Ugarte, University of Illinois at Urbana-Champaign, USA; Dane W. Hunter, Southern Illinois University, USA; and Michelle M. Wander, University of Illinois at Urbana-Champaign, USA*
8. Assessing the effects of crop residue retention on soil health: *Hero T. Gollany, USDA-ARS, USA*

Part 3 The role of organic and other soil amendments

9. Assessing the effects of compost on soil health: *Cristina Lazcano, University of California-Davis, USA; Charlotte Decock, California Polytechnic State University, USA; Connie T. F. Wong, University of California-Davis, USA; and Kamille Garcia-Brucher, California Polytechnic State University, USA*
10. Assessing the effects of using animal manure on soil health: *Ashraf M. Tubeileh, California Polytechnic State University, USA; and Michael J. Goss, University of Guelph, Canada*
11. Assessing the effect of biosolids on soil health: *Fiona A. Nicholson, Anne Bhogal, Alison Rollett and John R. Williams, ADAS, UK*
12. Biofertilizers: assessing the effects of arbuscular mycorrhizal fungi on soil health: *M. J. Salomon, The Waite Research Institute and The School of Agriculture, Food and Wine, The University of Adelaide, Australia; S. F. Bender, Agroscope, Switzerland; T. R. Cavagnaro, The Waite Research Institute and The School of Agriculture, Food and Wine, The University of Adelaide, Australia; and M. G. A. van der Heijden, Agroscope and University of Zurich, Switzerland*
13. Biofertilizers: assessing the effects of plant growth-promoting bacteria (PGPB) or rhizobacteria (PGPR) on soil and plant health: *Elisa Zampieri, Institute for Sustainable Plant Protection, Italy; Iakovos S. Pantelides, Cyprus University of Technology, Cyprus; and Raffaella Balestrini, Institute for Sustainable Plant Protection, Italy*
14. The role of liming in improving soil health: *Richard C. Hayes, Jason R. Condon and Guangdi D. Li, New South Wales Department of Primary Industries, Australia*
