

BURLEIGH DODDS SERIES IN AGRICULTURAL SCIENCE

Understanding gut microbiomes as targets for improving pig gut health

Edited by Professor Mick Bailey and Emeritus Professor Chris Stokes
University of Bristol, UK

 burleigh dodds
SCIENCE PUBLISHING

AVAILABLE NOW

About the book

This collection summarises current research on the structure and function of the gastrointestinal tract in pigs, the factors that can influence its effectiveness, as well as the nutritional strategies that can improve gut development and optimise gut function.

About the editors

Dr Mick Bailey is Professor of Comparative Immunology at the University of Bristol's world-famous Veterinary School. He has an international reputation for his research on the development of the mucosal immune system in pigs.

Dr Chris Stokes is Emeritus Professor of Mucosal Immunology at the University of Bristol. Professor Stokes is internationally known for his research on mucosal immunity.

Understanding gut microbiomes as targets for improving pig gut health

Available in print and digital formats:

ISBN - print 978-1-78676-487-4

Pages 504

Pub. Date January 2022

Price £150/\$195/€180/C\$255

Series No AS103

Understanding gut microbiomes as targets for improving pig gut health

Edited by: Professor Mick Bailey and Emeritus Professor Chris Stokes, University of Bristol, UK

Part 1 The gut microbiome and pig gut health

1. Microbial ecosystems as targets for improving pig gut health: *Mick Bailey, Laura Peachey, Sarah Lambton and Chris Stokes, University of Bristol, UK*
2. Metabolic services of intestinal microbiota of swine: metabolism of carbohydrates and bile salts: *Weilan Wang, University of Calgary, Canada; and Tingting Ju and Michael G. Gänzle, University of Alberta, Canada*
3. Microbiological services delivered by the pig gut microbiome: *James T. Cullen, Waterford Institute of Technology, Ireland; Peadar G. Lawlor, Teagasc Moorepark, Ireland; and Gillian E. Gardiner, Waterford Institute of Technology, Ireland*

Part 2 Analysing the pig gut microbiome

4. The gut microbiota in pigs: ecology and biotherapeutics: *Thomas C. A. Hitch and David Wylensek, Institute for Medical Microbiology – RWTH University Hospital, Germany; Jürgen Harlizius, Chamber of Agriculture North Rhine-Westphalia, Germany; and Thomas Clavel, Institute for Medical Microbiology – RWTH University Hospital, Germany*
5. Understanding the relationship between the microbiome and the structure and function of the pig gastrointestinal tract: *Chunlong Mu and Weiyun Zhu, Nanjing Agricultural University, China*
6. Understanding the development of the gut microbiome in pigs: an overview: *Marion Borey, Jordi Estelle and Claire Rogel-Gaillard, Université Paris-Saclay, INRAE, AgroParisTech, GABI, France*

Part 3 Techniques to optimise gut function by manipulating gut microbiomes

7. The use of prebiotics to optimize gut function in pigs: *Barbara U. Metzler-Zebeli, University of Veterinary Medicine Vienna, Austria*
8. The use of dietary fibre to optimize microbial gut function in pigs, with particular consideration of dietary cereal grains and legumes: *Barbara A. Williams and Michael J. Gidley, Centre for Nutrition and Food Sciences, Queensland Alliance for Agriculture and Food Innovation, The University of Queensland, Australia*
9. The use of exogenous enzymes to optimize gut function in pigs: *David Torrellardona, Joan Tarradas and Núria Tous, IRTA, Spain*
10. Improving gut function in pigs to prevent dysbiosis and postweaning diarrhoea: *Charlotte Lauridsen, Ole Højberg and Nuria Canibe, Aarhus University, Denmark*
11. Improving gut function in pigs to prevent pathogen colonization: *P. Bosi, D. Luise and P. Trevisi, University of Bologna, Italy*
12. Microbial protein metabolism in the monogastric gastrointestinal tract: a review: *Kim C. M. Lammers-Jannink, Wageningen University and Research, The Netherlands; Stefania Magnúsdóttir, UMC Utrecht, The Netherlands; Wilbert F. Pellikaan, Wageningen University and Research, The Netherlands; John Pluske, The University of Melbourne, Australia; and Walter J. J. Gerrits, Wageningen University and Research, The Netherlands*
