About the book

This book reviews the wealth of research addressing the major challenges facing pig nutrition, including the need to meet the changing needs of animals as they grow whilst minimising environmentally-damaging nutrient losses, as well as improving feed conversion efficiency and finding more sustainable feed sources.

About the editor

Dr Julian Wiseman is Emeritus Professor of Animal Production at the University of Nottingham, UK.

He has published widely in the area of non-ruminant nutrition and product quality, has presented papers at some of the leading international conferences in this area and has written or edited a number of books on animal nutrition. He was co-organiser of the annual Nottingham Feed Conference.

Advances in pig nutrition

Available in print and digital formats:
ISBN - print 978-1-80146-694-3
Pages 414
Pub. Date June 2024
Price £150/\$195/€180/C\$255
Series No AS138

Advances in pig nutrition

Edited by: Emeritus Professor Julian Wiseman, University of Nottingham, UK

Part 1 Feed intake

1. Advances in understanding pig nutritional requirements and metabolism: *Robert J. van Barneveld, Robert J. E. Hewitt and Darryl N. D'Souza, SunPork Group, Australia*
2. Gastrointestinal development in pigs: implications for nutrition and performance: *John O'Doherty, Dillon Kiernan and Torres Sweeney, University College Dublin, Ireland*

Part 2 Feed formulation

3. Developing nutritional guidelines for pigs: *Jung Yeol Sung, Opeadura Timileyin Osunbami and Olayiwola Adeola, Purdue University, USA*
4. Modelling feed requirements for pigs to optimize feed efficiency: *Charlotte Gaillard, Ludovic Brossard, Florence Garcia-Launay and Jaap van Milgen, Institut Agro, France*
5. New approaches for determining the nutritional value of pig feed: *Gerald C. Shurson, University of Minnesota, USA*
6. Ensuring pig feed safety: *Chad Paulk, Jordan Gebhardt, Cassandra Jones, and Jason Woodworth, Kansas State University, USA*

Part 3 The role of feed additives in optimising pig nutrition

7. Understanding and optimizing the use of amino acids in pig nutrition: *Sung Woo Kim, Hyunjun Choi, Yesid Garavito Duarte, and Alexa R. Gormley, North Carolina State University, USA*
8. Understanding and optimizing the use of prebiotics in pig nutrition: *Knud Erik Bach Knudsen, Élisabeth Chassé, Niloofar Razmgah, Mette Skou Hedemann and Nuria Canibe, Aarhus University, Denmark*
9. Understanding and optimizing the use of exogenous enzymes in pig nutrition: *M. R. Bedford and G. Cordero, AB Vista, UK*

Part 4 Alternative feed sources

10. Co-products and other alternative feedstuffs for sustainable pig production: an overview: *Ruurd T. Zijlstra, Li Fang Wang and Eduardo Beltranena, University of Alberta, Canada*
11. Developing alternative sources of protein in pig nutrition: insects: *Kristy DiGiacomo, University of Melbourne, Australia*
12. Green feed in organic pig farming: *Anne Grete Kongsted, Marleen Elise van der Heide, Lene Stødkilde, Jakob C. Johannsen and Maria Eskildsen, Aarhus University, Denmark*
13. High protein corn fermentation products for swine derived from corn ethanol production: *Peter E. V. Williams, FluidQuip Technologies, USA*
