Supporting sustainable agriculture through trusted knowledge

POULTRY SCIENCE CATALOGUE
POULTRY

Embryo development and hatchery practice in poultry production

Editor: Dr Nick French

This collection reviews the latest research on embryo development, as well as the effects of incubation and the hatching stage on chick health, welfare and production traits.

Pub. Date: May 2023  Price: £150/$195/€
Series No: 134

CHAPTER TITLES

Improving poultry meat quality

Editors: Professor Massimiliano Petracci, Alma Mater Studiorum - Università di Bologna, Italy and Dr Mario Estévez, Universidad de Extremadura, Spain

This collection summarises recent research on genetic and environmental factors affecting the development of quality traits in poultry meat and their implications for breeding, husbandry and postharvest processing.

Pub. Date: December 2022  Price: £150/$195/€
Series No: 127

Empowering knowledge - delivering sustainable agriculture

**Advances in poultry genetics and genomics**

Editors: Professor Samuel E. Aggrey, Professor Huaijun Zhou, Dr Michèle Tixier-Boichard and Professor Douglas D. Rhoads

This volume addresses the key advances in genomic selection and their practical application in breeding improved breeds of layers and broilers.

Pages: 580

Pub. Date: July 2020  
Price: £190/$245/€

**CHAPTER TITLES**

**Part 1 Poultry domestication, genetics and physiology;**  
1. The origin and domestication of poultry species;  
2. Molecular identification of major morphological mutations in poultry;  
3. The genetic basis for pigmentation phenotypes in poultry;  
4. Physiological challenges in poultry breeding;  
5. Genetics and genomics of complex traits;  
6. Genetics and genomics of meat quality traits in poultry species;  
7. Genetics and genomics of feed utilization efficiency in poultry species;  
8. Genetics and genomics of behavioral and welfare traits in poultry species;  
9. Genetics and genomics of immunity and disease traits in poultry species;  
10. Genetics and genomics of skeletal traits;  

**Part 2 Genetics and genomics of complex traits;**  
11. Genetics and genomics of meat quality traits in poultry species;  
12. Genetics and genomics of egg production traits in poultry species;  
13. Genetics and genomics of feed utilization efficiency in poultry species;  
14. Genetics and genomics of behavioral and welfare traits in poultry species;  
15. Genetics and genomics of immunity and disease traits in poultry species;  
16. Genetics and genomics of skeletal traits;  

**Part 3 Use of omics in poultry breeding;**  
11. Theory of genome-wide association for QTL detection;  
12. Genomic selection using Bayesian methods;  
14. Application of genomic selection (GS) in breeding commercial meat-type chickens;  
15. Application of genomic selection in commercial egg-type populations;  
16. Landscape genomics: application in poultry breeding;  

**Part 4 Emerging issues and future challenges in poultry breeding;**  
17. Breeding for small-scale poultry farming;  
18. Poultry breeding for sustainability and plasticity in functional traits: reality or fiction in the midst of conflicting interests;  
19. The use of nutrigenomics in poultry breeding for sustainable production;  
20. The use of epigenetics in poultry breeding;  
21. The use of genome editing in poultry breeding

---

**Improving gut health in poultry**

Editor: Professor Steven C. Ricke, University of Arkansas, USA

This collection summarises current research on the composition and function of the gastrointestinal tract in poultry, the factors that affect its function, and nutritional strategies to optimise poultry nutrition and health.

Print ISBN: 978-1-78676-304-4  
Pages: 546

Pub. Date: November 2019  
Price: £180/$235/€

**CHAPTER TITLES**

**Part 1 Understanding the gastrointestinal tract;**  
1. Commercial poultry production and gut function: a historical perspective;  
2. Advances in sequence technologies for generating poultry gut microbiome data;  
3. Omics technologies for connecting host responses with poultry gut function;  
4. Understanding gut microbiota in poultry;  
5. In ovo development of the chicken gut microbiome and its impact on later gut function;  
6. Understanding gut function in poultry: immunometabolism at the gut level;  
7. Understanding gut function in poultry: the role of commensals, metabolites, inflammation, and dysbiosis in intestinal immune function and dysfunction;  
8. Genetics and other factors affecting intestinal microbiota and function in poultry;  
9. Antibiotics and gut function: historical and current perspectives;  
10. Gastrointestinal diseases of poultry: causes and nutritional strategies for prevention and control;  
11. The interaction between gut microbiota and pathogens in poultry;  
12. Microbial ecology and function of the gastrointestinal tract in layer hens;  

**Part 2 Factors that impact the gastrointestinal tract and different types of birds;**  
8. Genetics and other factors affecting intestinal microbiota and function in poultry;  
9. Antibiotics and gut function: historical and current perspectives;  
10. Gastrointestinal diseases of poultry: causes and nutritional strategies for prevention and control;  
11. The interaction between gut microbiota and pathogens in poultry;  
12. Microbial ecology and function of the gastrointestinal tract in layer hens;  

**Part 3 Feed additives and gut health modulation;**  
13. Controlling pathogens in the poultry gut;  
14. The role of probiotics in optimizing gut function in poultry;  
15. Role of prebiotics in poultry gastrointestinal tract health, function, and microbiome composition;  
16. The role of symbiotics in optimizing gut function in poultry;  
17. Short chain organic acids: microbial ecology and antimicrobial activity in the poultry gastrointestinal tract;  
18. The role of essential oils and other botanicals in optimizing gut function in poultry;  
19. The role of specific cereal grain dietary components in poultry gut function
Achieving sustainable production of poultry meat - Volume 1
Safety, quality and sustainability
Editor: Professor Steven C. Ricke, University of Arkansas, USA
This volume discusses the main pathogens affecting poultry production, as well as how meat quality traits can be optimised to meet consumer expectations.

CHAPTER TITLES

Achieving sustainable production of poultry meat - Volume 2
Breeding and nutrition
Editor: Professor Todd Applegate, University of Georgia, USA
This book discusses the recent significant advances in poultry breeding and nutrition, focussing on key developments such as marker-assisted breeding.

CHAPTER TITLES
Achieving sustainable production of poultry meat - Volume 3
Health and welfare

Editor: Professor Todd Applegate, University of Georgia, USA

This collection reviews our understanding of bacterial, viral and other diseases affecting poultry and their effective management.

eBook ISBN: 978-1-78676-075-3  
Pages: 350

Pub. Date: August 2017  
Price: £160/$210/€190  
Series No: 15

CHAPTER TITLES

Achieving sustainable production of eggs - Volume 1
Safety and quality

Editor: Professor Julie Roberts, University of New England, Australia

This first volume considers recent developments in understanding egg composition and chemistry, as well as the key pathogens in eggs.

Print ISBN: 978-1-78676-076-0  
eBook ISBN: 978-1-78676-079-1  
Pages: 430

Pub. Date: March 2017  
Price: £170/$220/€205  
Series No: 16

CHAPTER TITLES

Achieving sustainable production of eggs - Volume 2

Animal welfare and sustainability

Editor: Professor Julie Roberts, University of New England, Australia

This second volume reviews nutrition and other aspects of husbandry affecting laying hens, as well as how egg production can be made more sustainable.

CHAPTER TITLES

Part 1 Animal health and welfare;

Ways to Order

All our books are available in print and digital formats. Chapters are available in digital formats only. There are a variety of ways to purchase and gain access to the content.

Individual (print, e-books & e-chapters)
